Mr. Miller stated he understands this is a reduction from last year. As Mr. Ducote indicated, in about a month, this matter will be up before the Louisiana Tax Commission.

Mr. Carey Westbrook, Tax Assessor's Office, handles the assessments for commercial property, oil and gas, passed out information and gave a brief overview of the assessment equates. The Tax Commission Tables were used.

Mr. Stokes stated their values are fair and uniform with other like properties. The Tax Commission will be appraising these two properties also. Mr. Stokes requested the Police Jury uphold the values that the Assessor's Office has provided.

Mr. Matthew Amescua, representing Waste Connections Bayou, Inc., stated that in 2016 Waste Connections and Progressive Waste Solutions merged together and what the Assessor has asked us to do is allocate more cost removable assets like the dumpsters and the residential carts. The older company, Progressive Waste, reported everything to Rapides Parish. What they did was the total cost and split it up by percentages and reported those to the correct Parishes, rather than reporting 100% to Rapides Parish.

Mr. Ducote stated personal property, has always been across the board. We use the actual cost of an asset. When a company reports to the Assessor, we want to know what the asset cost and when they bought it. Waste Management, IESI and some other companies, all these years, has always been good about reporting the cost and the age of the equipment. Last year, Waste Connections bought it, this is the first year we didn't get what we needed. We got a revamped asset list and could tell there was something wrong, we requested more information and couldn't get it. We used the previous reported assets of Waste Management and added new assets to they had in 2017. This year was a little lower, so we did the same thing. We tried to get information and we couldn't. We asked for a location of all the bins and the carts at houses and they can't provide that or they won't. Mr. Ducote stated he thought the valuation that they are wanting us to use, for one is an out of date balance. If you look at what he states, he is saying when Waste Connections bought it from Waste Management or whatever company, they didn't care about the assets, they just wanted the customers list. Well, that throws that out, you can't use allocations and we're not allowed to use an allocated value for personal property to make valuations for property tax purposes. He stated he needs original costs and locations of all the units. The big problem, because we don't have locations, or even the general area, your districts are not getting revenue from them. Think about the bins and the carts of the folks that are in your area, we can't allocate them because they won't give locations. We need to know how many are in Pineville, how many in Alexandria, Deville, Tioga, Glenmora, anywhere. We need to allocate that to those Districts. We can't get simple information from Waste Connections. We have done this for everybody. You can't provide us with information, the second best information is what we have. It's what we previously rely on and then we add in additions. We depreciate it, we still treat them like everybody else, but if we can't get our information, we are not going to low rate it, just because of the

information they won't give us. Mr. Ducote stated that he would recommend that the Jury uphold our values and once it gets to the Tax Commission, they may or may not come in revalue, and generally what they do is revalue a whole company statewide on its personal property.

Mr. Ollie Overton questioned Mr. Ducote if he had considered the two merges they had this year, to which Mr. Ducote stated yes, both locations. Highway 165 is where they process the garbage and trash and England Drive is the physical site where they do maintenance and the offices. They reported a list of assets. It was lengthy, but it's generalized. You can't tell where the totes are, can't tell if they are reporting the scales on Hwy. 165 or some of the maintenance equipment, some of the loaders and other things. He further stated he didn't feel confident that he has all of the bins. You think about our parish and just about every commercial building, from churches to schools has a bin. We do the best we can, with what we have.
